Bridge construction

Hünnebeck and Strukturas agree on strategic partnership

Ratingen, September 2021 Hünnebeck, one of the leading international manufacturers of formwork and scaffolding systems, and Strukturas, a specialist provider for bridge construction equipment, have agreed on a strategic partnership with immediate effect. The aim of this partnership is to offer customers a comprehensive portfolio for complex bridge construction projects from a single source. Strukturas brings its long-term expertise for movable scaffolding systems (MSS) as well as for the planning, delivery and assembly of form travelers into this partnership. Hünnebeck plans and supplies formwork systems for piers, abutments, trough structures and parapets, heavy-duty shoring systems as well as safety and height access technology for the construction site. For this, Hünnebeck draws on its large international network of application engineers, who have been bundled in the Infrastructure Competence Centre since 2020. Logistics, cleaning and repair services round off the offer.

The expanded range is available immediately in Germany, Austria, Switzerland, Croatia, Bosnia and Herzegovina, Serbia, Montenegro and Macedonia. Enquiries in these markets will be handled by Hünnebeck as the central point of contact.

„For the customer, the cooperation between Hünnebeck and Strukturas offers enormous advantages,“ explains Gerald Schönthaler, Managing Director of Hünnebeck Austria and Director Infrastructure at Hünnebeck internationally. „Especially in large infrastructure projects, the reduction of contact points increases efficiency in project execution and thus contributes to faster construction times and lower overall costs.“

„Strukturas and Hünnebeck have already worked together very successfully in the past, for example in Romania. We are very pleased that we can now bring our specialized applications to new markets together with Hünnebeck and complement them with system solutions and services from Hünnebeck. This is a real power package!“ says Oyvind Karlsen, General Manager from Strukturas.

About Hünnebeck

Hünnebeck is one of the leading international suppliers of formwork, scaffolding and safety technology. Since 1929, the company has been supporting the construction industry with solutions characterized by top quality, high flexibility and a high level of cost-effectiveness. As part of the international BrandSafway group, Hünnebeck offers all the advantages of a worldwide network with 340 branches and 38,000 employees.
